

Tech Department Reports

Overview

The Tech Report document is a comprehensive overview of the technology department and the various services we provide, systems we support, and the type of access to technology provided to students and staff in our school district.

Questions about the contents of this report should be directed to Bryan Drozd, Director of Instructional Technology. E-mail is preferred: bdrozd@shakopee.k12.mn.us, or you can call (952) 496-5174.

The original 2017 version of the report (from November, 2017) and the 2019 version (from May, 2019) are included. The 2017 version was written as a "baseline" document, so the 2019 version follows a similar format with various items updated.
