

Animoto

What is Animoto?

Animoto is both a web-based and app-based video creation tool. Take photos or video and add text, transitions, and music to create book trailers, Public Service Announcements, or other videos.

Why is this a great tool?

Animoto is extremely easy to use and there are specific educational licenses, which make it great for students to voice their creativity and embrace digital storytelling.

How do I use it?

Teachers can apply for a free Animoto account for themselves and up to 50 students. You can use your own pictures and video clips, along with our extensive music library and wide selection of video styles, to create an unlimited number of slideshow videos. And since Animoto is cloud-based, you or your students can work on videos anywhere — whether you're in the classroom, at home, or on a mobile device using our educational app. (**From Animoto website 5/31/18*)
